

SPIS TREŚCI

1. Krzaczek P., Piekarski W.: Utilization of vehicle control-diagnostic system in evaluation of energetic parameters	7
2. Kyrylovych V., Sazonov A.: Unit of adaptation grippers of industrial robots	15
3. Lubas J.: A comparison of the tribological behaviours materials modified of boron in the sliding pairs	19
4. Malega P.: Model that rates technical effectiveness of production	29
5. Malejčík J., Brezinová J., Guzanová A.: High solid coatings quality in selected corrosion media	35
6. Malyarenko A., Mitenkov M., Kvasuk S.: Research of lap thermal deformation at operational development of optical surfaces at the expense of a temperature variation of polishing slurry	39
7. Olexová M., Slota J., Herditzky A.: Microstructure evaluation of trip steel used in a car crash zones	45
8. Pasternak I., Sulym H.: The unified approach for the analysis of elastic equilibrium of solids containing thin internal and surface heterogeneities	51
9. Shabaycovitch V.: Competitiveness of manufacture	61
10. Slota J., Gajdoš I.: Numerical simulation of the hydraulic bulge test of HSLA steel and experimental verification of results	67
11. Sobotová L., Spišák E.: Thermal drilling as a progressive technology of creating of bushings	73
12. Sobotová L., Dulebová L.: Evaluation of some mechanical properties of steel sheet	79
13. Spišák E., Majerníková J.: Annealing process and its influence on mechanical properties of packaging sheets	85
14. Spišáková E.: The comparison of innovation activity of Slovak and Polish enterprises	93
15. Todorov M., Draganov I.: Equations of elasticity theory in a helical coordinate system	103
16. Varga J., Greškovič F.: The influence of radiation crosslinking on mechanical properties of plastics	115
17. Viňáš J., Brezinová J., Guzanová A.: Tribological properties of selected ceramic coatings	121

18. Viňáš J., Brezinová J., Guzanová A., Lorincová D.: Hard surfacing repairing layers in erosive wear process	127
19. Viňáš J., Kaščák L., Ábel M., Draganovská D.: The quality analyze of MIG soldering zinc-coated steel sheets by destructive testing	135
20. Wolańczyk F.: The investigation of thermal conductivity of low-alloyed high speed steels	141
21. Zając G., Krzaczek P.: Comparison of rapeseed ethyl and methyl esters utilization influence on engine energetic parameters	145
22. Zdravecká E., Franta L., Ondáč M.: The carbon layers for bio-tribological applications	151
Index of authors	155
