

# Journal of Mathematic and Applications

vol. 33 (2010)

## Contents

1. **A. Cătaș:** *On a starlikeness of order  $\alpha$  condition formeromorphic  $m$ -valent functions*
2. **J. Dziok, A. Szpila:** *Generalized classes of uniformly convex functions*
3. **A. M. A. El-Sayed, Sh. M. Al-Issa:** *Monotonic continuous solution for a mixed type integral inclusion of fractional order*
4. **T. Ereú, N. Merentes, B. Rzepka, J. L. Sánchez:** *On composition operator in the algebra of functions of two variables with bounded total  $\Phi$ -variation in Schramm sense*
5. **H. Leiva, N. Merentes, J. Sanchez:** *Interior controllability of the Benjamin-Bona-Mahony equation*
6. **A. Leśniewski:** *The Demyanov metric and measurable multifunctions*
7. **A. A. Lupaș:** *Certain differential subordinations using a generalized Sălăgean operator and Ruscheweyh operator*
8. **P. Maheshwari, D. Sharma:** *Rate of convergence for certain mixed family of linear positive operators*
9. **L. Navaei:** *Multiple hypotheses optimal testing for Markov chains and identification subject to the reliability criterion*
10. **N. Palaniappan, P.S. Veerappan, M. Ramachandran:** *On intuitionistic fuzzy ideals in  $\Gamma$ -rings*
11. **T. V. Sudharsan, R. Thirumalaisamy, S. Sivasubramanian, K. G. Subramanian:** *A new class of analytic functions based on Ruscheweyh derivative*
12. **V. A. Trenogin, A-V. Ion:** *New results in the stability study of non-autonomous evolution equations in Banach spaces*
