

Journal of Mathematics and Applications

vol. 35 (2012)

Table of contents

Y. Bezhuashvili, R. Rukhadze: *The Fourier method in three-dimensional dynamical problems of the hemitropic theory of elasticity*

S. Ghorbani: *The reticulation of residuated lattices Induced by fuzzy prime spectrum*

E. Jabłońska: *Remarks concerning the pexiderized GółabSchinzel functional equation*

H. Leiva, N. Merentes and J.L. Sanchez: *Controllability of the semilinear Benjamin-Bona-Mahony equation*

K. Raghavendar, A. Swaminathan: *Close-to-convexity properties of basic hypergeometric functions using their Taylor coefficients*

K. Raj, A. Gupta: *Multiplier sequence spaces of fuzzy numbers defined by a Musielak-Orlicz function*

A.A. Shokri, A. Shokri: *Maximal ideal space of certain α -Lipschitz operator algebras*

G. Stoica: *Complete convergence under special hypotheses*

A. Wloch and I. Wloch: *On parameters of independence, domination and irredundance in edge-coloured graphs and their products*
