

SPIS TREŚCI

| | |
|--|-----|
| 1. Angelov Y.: Multicriteria optimization of metal cutting machine's main drive | 7 |
| 2. Baksiova Z.: Principal strain separation on coated specimen | 13 |
| 3. Bezvesilnaja E., Podchashinsky Y.: Increase of accuracy of linear accelerometers using of artificial neural network | 17 |
| 4. Bozdouganova V., Todorov M.: Computation of plane structures eigenfrequencies by hybrid finite element method using trefftz functions | 25 |
| 5. Bozdouganova V., Todorov M.: Eigenfrequencies determination by hybrid stress finite element method | 33 |
| 6. Brezinová J., Guzanová A., Guzan M., Malejčík J.: The electrochemical characteristics of surface pre-treated by abrasive blasting | 39 |
| 7. Brezinová J., Halama M., Kaščák L., Viňáš J.: Analysis of spot welds quality of zinc-coated sheets and their corrosive properties | 47 |
| 8. Drobotov A., Kristal M.: Program controlled air cushion rotary table with pneumatic stream drive | 53 |
| 9. Dulebová L., Greškovič F.: The influence of amount of filler on mechanical properties for electro products | 59 |
| 10. Evin E., Audy J.: Evaluation of coefficient of friction of uncoated and TiN coated tools in deep drawing | 65 |
| 11. Fabian M., Spišák E., Šeminský J., Slota J.: The latest actual trends in process of design and production in automotive industry | 73 |
| 12. Gajdoš I., Kaňuch P.: Complex approach to the reverse engineering techniques | 81 |
| 13. Gajdoš I., Slota J.: Improving surface finish quality of FDM prototypes | 87 |
| 14. Greškovič F., Dulebová L., Varga J.: The new trends in design moulds for plastic .. | 91 |
| 15. Grigorieva N.: Designing of technological assembly modules | 97 |
| 16. Hajduk M., Čirip M., Sukop M.: Planning and calculation of trajectory of humanoid robot motion | 103 |
| 17. Ilchenko A., Zabashta E., Lomakin V.: A flywheel of variable moment of inertia | 109 |
| 18. Jankura D.: Research of the structure and adhesive properties of ceramic coatings .. | 113 |
| 19. Kaščák L., Spišák E., Mucha J.: Joining of steel sheets for automotive industry using press joining method | 121 |

| | |
|--|-----|
| 20. Kaščák L., Viňáš J.: Influence of welding parameters of resistance spot welding on the quality of welded joints..... | 127 |
| 21. Kaščák L., Viňáš J., Mišičko R., Takáčová I., Vojtko M., Schmögner M., Matta M., Gatial M.: The causes of failures in resistance spot welding of car body sheets . | 135 |
| 22. Kheifetz M., Koukhata S.: System analysis of surfacing at intensive processing and using of details | 143 |
| 23. Krzaczek P., Dzieniszewski G.: Analysis of energetic parameters of John Deere 6620 agricultural tractors | 151 |
| Index of authors | 157 |
