## Introduction

*Expect the Unexpected* is a coursebook aimed at pilots and air traffic controllers who intend to practice communication skills in non-routine situations, in accordance with ICAO Language Proficiency Requirements for ICAO level 4 and higher.

The coursebook does not focus on teaching ICAO Standard Phraseology but is designed to equip learners with plain English necessary for air traffic communication in non-routine and unexpected situations. The content of the book is based on real-life ATC language input.

The book includes a CD with audio files and the answer key and is intended for both classroom use and self-study.

The authors would like to express their gratitude to LiveATC for sharing the audio material, Henry Emery, teacher and aviation English specialist, for his invaluable tips and a huge amount of editorial work and Piotr Steinbrich, PhD for his review of this book. Last but not least, we would like to thank pilot Maciej Boratyn, for his subject matter support.
