

Hypercomplex numbers of the Fibonacci type

Anetta Szynal-Liana, Iwona Włoch

monografia

słowa kluczowe: *quaternions, bicomplex numbers, hybrid numbers, hybrinomials, Fibonacci numbers*

© Copyright by Oficyna Wydawnicza

ISBN 978-83-7934-338-6

format B5

128 stron

oprawa miękka

cena: 18 zł

Contents

Notation

Preface

- 1 Hypercomplex numbers
 - 1.1 Complex numbers
 - 1.2 Quaternions
 - 1.3 Octonions, sedenions and trigintaduonions
 - 1.4 Tessarines and bicomplex numbers
 - 1.5 Dual numbers, hyperbolic numbers and hybrid numbers
- 2 Numbers and polynomials of the Fibonacci type
 - 2.1 A short history of numbers of the Fibonacci type
 - 2.2 Binet formulas and generating functions
 - 2.3 Binomial representations
 - 2.4 The Fibonacci type identities
 - 2.5 Matrix generators for numbers of the Fibonacci type
 - 2.6 Fibonacci type polynomials
 - 2.7 Generalizations
- 3 Quaternions of the Fibonacci type
 - 3.1 Pell quaternions and Pell-Lucas quaternions
 - 3.2 $F(p; n)$ -Fibonacci quaternions and $L(p; n)$ -Lucas quaternions
- 4 Bicomplex numbers of the Fibonacci type 63
 - 4.1 Bicomplex Jacobsthal numbers
 - 4.2 Generalized Fibonacci and Lucas bicomplex numbers
 - 4.3 Matrix generators for generalized bicomplex Fibonacci and Lucas numbers
- 5 Hybrid numbers of the Fibonacci type
 - 5.1 Horadam hybrid numbers
 - 5.2 Balancing hybrid numbers
- 6 Hybrinomials of the Fibonacci type
 - 6.1 Denition and basic properties
 - 6.2 Fibonacci type hybrinomials identities
 - 6.3 Matrix generator for hybrinomials
